Segment	Purpose
Fund	Separate fiscal and accounting entity with a self-balancing set of accounts, recording cash and other financial resources, together with all related liabilities and residual equities or balances or changes therein.
Location	Specifies whether a transaction is associated with the supervisory union, supervisory or school district, or school/site. "Handbook II" will specify when to use which code if you have multiple options.
Level	Indicates grade level. The Handbook II will specify when certain grade levels should be used, or when and how to use location-wide code. In general, should location-wide need to be allocated to elementary or secondary by the state, per pupil counts based on enrollment will be used.
Program	Allows for tracking programs, which are a plan of activities and procedures designed to accomplish a predetermined objective or set of objectives. No drilling down on program is allowed at this time.
RevSource	Tracks revenues and expenditures associated with a particular funding source (local, state, federal, or some mix) as per ESSA. The Handbook II will identify when "mixed-source" codes should be used, and how they will be treating in reporting by the State.
Function	Describes the activity for which a service or material object is acquired. This segment will include locally specified "department" within some of the major function areas.
Type	Indicated whether a transaction is an asset, liability, expenditure, revenue, or fund balance/net position. In e-FinancePLUS, this will be combined with object or "revenue" or a balance sheet code to create the segment "Account".
Object	Describes the service or commodity obtained as a result of a specific transaction. There are both state-required and locally specifiable object codes.
Revenue	Local, State, Federal and other restricted and unrestricted funds.
Balance Sheet	Used to track financial transactions for each fund.
Project	There will be a project field (outside of the chart in eFinancePLUS) that can be used to track revenues and expenditures associated with a certain set of activities that is not easily tracked with the chart (e.g. student activities, grant tracking, high cost/state placed students etc.). For those not on eFinance you may add a discretionary segment if needed to track these items. For eFinancePLUS users, please use the project schema outlined in the "Project" tab.
