

## **EXHIBIT 1A: Contractors Statement of Experience with Building Energy Standards and Sustainability Practices**

This Exhibit is part of DOCUMENT 00 1153 – REQUEST FOR QUALIFICATIONS, submitted by and dated the \_\_\_\_ day of \_\_\_\_ in the year. *(In words, indicate day, month, and year.)*

### ORGANIZATION

Name and Location

Identify the full legal name of your organization.

Contractor's experience in the following areas will be considered in the qualification process:

A. Demonstrated ability to construct a thermal envelope with continuous air barrier as required by the 2020 Vermont Commercial Building Energy Standards.

A.1. Evidence of this ability can include an airtightness testing report on a facility of this size or larger and, either an air barrier commissioning report or a jobsite sequence of operations plan designed to ensure air-barrier integrity during construction.

A.2. Attach any reports with your Submittal.

B. Demonstrated ability to deliver a project that meets LEED certification requirements or equivalent, as evidenced by certification or by a report indicating how LEED or a similar program was used as a guideline.

B.1. Attach any reports or describe the process used, provide the project name(s), address and year completed.

C. Contractor's Commitment to Sustainable Building Practices

C.1. Has your organization committed to sustainable construction practices such as those described in the "Contractors Commitment to Sustainable Building Practices?"

(See: <https://www.buildinggreen.com/contractors-commitment> (A commitment to this program is considered a plus and is not a requirement.)

C.2. If so, please describe your company's practices in the areas outlined in that program.
